

1	<i>Characterization of the lipase-catalyzed esterification of succinic acid with ethanol</i> Emrah Altuntepe, Christoph Held, Gabriele Sadowski
2	<i>Toward Molecular Recognition</i> David Bulfield
3	<i>QM/MM Grid Cell Theory studies of solvent effects</i> Georgios Gerogiokas
4	<i>Electronic structure of carbenes: towards chemical accuracy</i> Reza Ghafarian-Shirazi
5	<i>Solvation Effects on Functional Organic Molecules and their Photodynamic Behavior</i> Lena Grimmelsmann, Christian Spies, Patrick Nuernberger
6	<i>Tropyl Radical</i> Matin Kaufmann
7	<i>Hydrogen as non-conventional solvent for reactive intermediates</i> Joel Mieres Perez, Enrique Mendez Vega, Stefan Henkel, and Wolfram Sander
8	<i>Matrix polarity and solvated electrons</i> Adam Plenert, Gizem Dübek, and Wolfram Sander
9	<i>Transfer of chirality observed by matrix isolation and VCD spectroscopy</i> Corina Pollok
10	<i>Solvation studies of reactive intermediates in water ice matrices</i> Souyma Radhakrishnan, Genevieve Richter, Paolo Costa, and Wolfram Sander
11	<i>Halogen-Bond-Based Organocatalysis with Chiral Counterions</i> Nils Schulz
12	<i>Investigation of Synergetic Effects on the Photophysics of Spiropyrans in Solvent Mixtures</i> Christian Spies, Claudio Beakovic, Patrick Nuernberger
13	<i>Interaction of carbenes with halogen-bond donors probed by matrix isolation spectroscopy</i> Iris Trosien, Stefan Henkel, Linda Klute, Genevieve Richter, Akshay Raut, and Wolfram Sander
