

COLLOQUIUM ANNOUNCEMENT

WEDNESDAY, 10.02.2016

16:00 h NC 02/99

Prof. Mike Ashfold

School of Chemistry, University of Bristol, U.K.

"Molecular photofragmentation dynamics in the gas and condensed phases: similarities, differences, challenges and opportunities"

Mike Ashfold has been a Professor of Physical Chemistry at the School of Chemistry, University of Bristol since 1992. His research focus is on molecular photochemistry and photophysics using a variety of state-of-the-art laser based techniques. His current interests are moving increasingly towards the use of ultrafast time-resolved pump-probe methods to explore the photophysics of (bio)molecules in solution.

Guests are very welcome!
